TECHNICAL SKILLS

WORK EXPERIENCE

Full Stack Developer — Circle Lab

Jun 2025 – Jun 2026

Cloudflare Management Internal Tool

- Built an internal tool for automated web deployment and Cloudflare configuration via templates, reducing manual ops overhead.
- Participated in **database design**, backend implementation, and frontend UI.

Customer Support & Loyalty Points System

- Designed and implemented full-stack system for customer support with **real-time notifications** via WebSocket.
- Architected a **tiered loyalty points** system with level-based rewards and referral commission distribution.
- Implemented **cron job management** for scheduled reward processing and background tasks.

Customer Mini-Game

- Implemented **WebSocket** layer for real-time mini-game interactions and integrated reward point crediting.

Backend Developer — DOIT Solutions

Jun 2023 – Mar 2025

- Designed and implemented a production optimization system for a biology lab using **Domain-Driven Design (DDD)**.
- Built an inventory and product management module with a **MySQL** schema optimized for data integrity and query performance.
- Defined project folder structure, API design, and data flow for a **Go/Gin** backend.
- Implemented **Redis** caching and task scheduling for background processes.

- Developed a real-time error tracking and notification system; collaborated with **Vue.js** frontend team.

Intern Backend Developer — DOIT Solutions

Mar 2023 – Jun 2023

- Contributed to warehouse management feature design for an agricultural enterprise.
- Developed frontend features with **Vue.js** and built RESTful APIs using **Gin**.
- Optimized database queries with **Gorm** and MySQL to improve system performance.

PROJECTS

Creative Contract Website

app.creativecontact.vn

- Built frontend with **Next.js**, optimized file uploads, managed state with **Zustand**, integrated **Supabase** and shadcn/ui.

EDUCATION

Engineer of Information Technology

Da Lat University

AWARDS

3rd place Techfest Lam Dong 2023
